SCQF: Level 6

Management of People and Finance

J22A 76

- **Unit 2**
- **Training and Professional Development**

#ItAllAddsUp

Training

- Training is a systematic process of enhancing employee knowledge, skills, and behavior to achieve organizational goals.
- It bridges the gap between current and desired performance.

Relevance of Training to the Organisation

1. Improves productivity and quality.
2. Enhances employee morale and retention.
3. Supports innovation and adaptability.
4. Builds competitive advantage.

Relevance of Training to the Employee

1. Enhances career growth and employability.
2. Improves confidence and job satisfaction.
3. Reduces errors and improves efficiency.
4. Encourages lifelong learning.

Training and Organizational Performance

- Effective training aligns employee capabilities with organizational objectives, resulting in better performance, innovation, and profitability.

Types of Training – On-the-Job Training

Training provided at the workplace while the employee is actually doing the job. It allows employees to learn by performing real tasks under supervision.

Key Features:

- Conducted at the work location
- Practical and experience-based learning
- Immediate application of knowledge

Methods:

- **Coaching:** One-to-one guidance from a senior or expert.
- **Job Rotation:** Employees move through different jobs to gain varied experience.
- **Apprenticeship:** Long-term training combining work and study, often in technical fields.
- **Internship:** Short-term practical training for students or trainees.
- **Mentoring:** Continuous guidance and support by an experienced employee.

Types of Training – Off-the-Job Training

- Training conducted away from the regular work environment. Employees learn through structured programs, lectures, simulations, or workshops.

Key Features:

- Takes place in classrooms, training centers, or online platforms
- Focus on theory and skill development
- Often uses specialists or external trainers

Methods:

- **Lectures and Seminars**
- **Workshops and Conferences**
- **Role Playing and Case Studies**
- **Simulation and Vestibule Training** (replicating real job conditions)
- **E-learning / Virtual Training**

Induction and Orientation Training

- **Induction Training** (also called **Orientation Training**) is the process of **introducing new employees** to the organization, its policies, culture, values, and the people they will work with.
- It helps new recruits adjust quickly and become productive members of the organization.
- Helps new employees understand company policies, culture, roles, and expectations. Builds belonging and reduces anxiety.

Objectives of Induction & Orientation

- To familiarize new employees with the organization's goals, policies, and procedures
- To help them understand their job roles and responsibilities
- To create a sense of belonging and comfort in the new workplace
- To reduce anxiety, confusion, and turnover among new employees
- To build positive attitudes towards the organization and its culture

Contents of Induction Programme

A typical induction programme includes:

- Introduction to the **company's history, mission, and structure**
- Overview of **products/services** offered
- Explanation of **policies, rules, and regulations**
- Details about **salary, benefits, leave, and code of conduct**
- **Tour of the workplace** and introduction to team members
- Briefing on **safety procedures and reporting systems**

Process of Induction

- **Pre-arrival Stage:** Prepare workstation, documents, and schedule.

- **First Day Orientation:** Welcome session, introduction to team, facility tour.

- **Formal Induction Training:** Presentations, videos, manuals, or workshops explaining company policies and culture.

- **Follow-up:** Feedback sessions to address queries and check adaptation progress.

Difference Between Induction and Orientation

Aspect	Induction	Orientation
Scope	Covers organizational introduction	Focuses on specific job role and department
Purpose	Acquaint employee with organization's policies and culture	Help employee adapt to their specific work environment
Timing	Conducted first, on joining	Conducted after induction, before starting work

Technical Training

- Technical training is designed to provide employees with the knowledge and expertise to perform specific technical tasks related to their role. It often involves understanding machines, software, equipment, or production processes.

Examples:

- Training in using ERP systems (e.g., SAP, Oracle)
- Software programming or coding workshops
- Machine operation and maintenance training
- Network and cybersecurity training

Skill-Based Training

Skill-based training aims to develop specific skills—both hard skills (job-related) and soft skills (interpersonal)—needed to perform tasks effectively.

Types of Skills:

- **Hard Skills:** Data analysis, accounting, welding, machine operation, digital marketing, etc.
- **Soft Skills:** Communication, teamwork, leadership, problem-solving, time management

Examples:

- Communication and presentation workshops
- Leadership development programs
- Sales and negotiation training
- Project management training

Technical v/s Skill Based Training

Aspect	Technical Training	Skill-Based Training
Focus	Job-specific technical knowledge	Functional and behavioral skills
Nature	More mechanical or technological	More human and performance-oriented
Objective	Improve operational efficiency	Improve personal effectiveness
Examples	Coding, machine handling, software training	Communication, leadership, teamwork

Soft Skills and Behavioral Training

- Soft Skills and Behavioral Training focuses on developing employees' interpersonal abilities, attitudes, and emotional intelligence to improve workplace relationships, communication, and performance.
- It aims to build a positive and professional behavior that complements technical competence.
- Improves interpersonal, communication, and leadership abilities, essential for teamwork and management roles.

Soft Skills Training

- Soft skills refer to non-technical, interpersonal, and communication skills that help employees interact effectively with others and adapt to the work environment.

Examples of Soft Skills:

- Communication and Listening Skills
- Teamwork and Collaboration
- Leadership and Motivation
- Time Management and Organizational Skills
- Negotiation and Conflict Resolution
- Adaptability and Creativity

Methods of Soft Skills Training

- Role-playing and Group Discussions
- Case Studies and Simulations
- Workshops and Seminars
- Personality Development Sessions
- Public Speaking and Presentation Training

Behavioral Training

- Behavioral training aims to shape employees' behavior, attitude, and emotional responses to align with the organization's values and culture.
  It emphasizes developing positive behavioral patterns at work.

Examples of Behavioral Skills:

- Emotional Intelligence
- Stress Management
- Workplace Ethics and Discipline
- Conflict Management
- Positive Attitude and Empathy

Methods of Behavioral Training

- Behavioral Modeling (observing and practicing desired behavior)
- Psychometric Assessments and Feedback
- Coaching and Mentoring
- Experiential Learning Activities (outbound training, games, etc.)

Difference Between Soft Skills and Behavioral Training

Aspect	Soft Skills Training	Behavioral Training
Focus	Develops interpersonal and communication skills	Develops positive behavior, attitude, and mindset
Approach	Skill-based	Attitude and behavior-based
Goal	Effective interaction and teamwork	Positive behavioral change and emotional stability
Examples	Communication, leadership, teamwork	Empathy, stress management, ethics

Managerial and Leadership Development

- Develops strategic thinking, decision-making, and motivational abilities for current and future leaders.

Safety and Compliance Training

- Ensures employee well-being and adherence to regulations. Reduces workplace accidents and legal risks.

Diversity and Inclusion Training

- Promotes respect, equity, and understanding among employees from diverse backgrounds.

E-learning and Virtual Learning Facilities

- Digital platforms offering flexibility and accessibility. Examples: LMS, MOOCs, virtual classrooms.

Advantages of Virtual Learning

- 1. Cost-efficient.
- 2. Accessible anytime and anywhere.
- 3. Personalized learning pace.
- 4. Scalable for large workforces.

Challenges of Virtual Learning

- 1. Requires self-discipline.
- 2. Limited interpersonal interaction.
- 3. Technical issues may arise.
- 4. Difficult to assess engagement.

Blended Learning Approach

- Combines online and in-person learning for flexibility and better engagement.

Professional Development through Training Schemes

- Programs like management trainee schemes or graduate development programs nurture talent systematically.

Work-Based Qualifications

- Employees earn certifications or diplomas through on-the-job projects and performance evaluations.

Coaching and Mentoring as Training Tools

- Personalized guidance from experienced professionals enhances skill development and career growth.

Role of HR in Training and Development

- HR identifies training needs, designs programs, coordinates resources, and evaluates training effectiveness.

Identifying Training Needs

- Through performance appraisals, surveys, and skills audits to ensure training is goal-oriented and relevant.

Training Evaluation Methods

- Using models like Kirkpatrick's Four Levels – Reaction, Learning, Behavior, and Results to measure effectiveness.

Cost and Benefit Analysis of Training

- Helps determine ROI. Considers direct costs (facilities, materials) and indirect benefits (morale, retention).

Selecting Suitable Training Methods

- Choice depends on job type, employee level, and resources. E.g., technical jobs – hands-on; managerial roles – workshops.

Training in Small vs. Large Organisations

- Small firms often rely on informal, cost-effective methods, while large firms use structured programs and e-learning.

Trends in Corporate Training

- Gamification, AI-based learning, microlearning, and mobile learning are shaping the future of corporate training.

Government and Industry Support

- Skill India, NSDC, and other initiatives promote upskilling and industry-aligned certifications.

Benefits of Continuous Professional Development (CPD)

- Encourages a culture of learning, adaptability, and excellence among employees.

Case Study – Effective Training Program

- Example: Google’s continuous learning culture leads to innovation and high employee engagement.

Conclusion – The Future of Training

- Training is an investment, not an expense. Emphasizing lifelong learning ensures both individual and organizational success.
